where your **ideas**.....come to **life**....

# ★ ideal baccarat analysis software

The Concept Studio Ideal Baccarat Analysis Software allows the casino operator to network two or more electronic dealing shoes and access the data held in a central server accessed from the casino computers.

Operators will be able to search the data by Date, Table and Shoe Number for full Scorecard information.

By analyzing the results, operators can see the trends, and patterns of play over their baccarat gaming floor.
